

De La Salle School

Teacher of Science

Staff development is key to our ethos and our staff benefit from our outward looking approach. Teachers have at least 1 hour per fortnight (additional to PPA time) protected to work with their department on relevant learning and teaching research / practices from the Great Teaching Toolkit. Strong external relationships to provide a high level of guidance and professional development for teachers and support staff at all stages of their careers.

We are seeking to recruit an outstanding teacher of science to join our fantastic team of science specialists. This is an exciting time to join the team with science results showing an upward trend of improvements in progress and attainment measures and numbers of students opting for Triple Science growing. The successful candidate should be able to teach GCSE level across the full ability range. The ability to teach Health & Social Care would be an advantage, but not essential.

We are able to offer modern learning environments which include 8 science labs and full-time support from a senior science technician.
